

Wood Booth Seating

Model 862 & 872

You're not going to find better built wood booths. (And their simple elegance is a welcome addition to any venue.)

- Built from glued-up clear grain wood to minimize warping, twisting and cracking
- End panels are precisely routed to create a perfect connection for the seat and back
- No voids or pockets that can serve as collection points for dropped food
- Easy to produce designer looks with stains, upholstery colors, patterns, and combinations

We even test our products to exacting standards derived from ANSI/BIFMA. It's the only way we know to absolutely ensure that our products can stand up to the punishment they'll receive day in and day out.

No one takes more care to build you a solid wood booth. And that's why nobody builds a better one.
